

EXPERIMENT 8

ROLL NO 240701442

NAME: ROSHINI S

AIM: The aim is to create storyboards representing the user flow for a Mobile Movie Ticket Booking App using Balsamiq.

PROCEDURE:

1. Tool Used: Balsamiq Wireframes <https://balsamiq.com>
2. A new project was created and mobile screens were added to simulate the user's movie booking experience from start to finish.
3. Each screen represents a key step in the movie browsing and ticket purchase process.
4. UI components such as buttons, text fields, dropdowns, images, and icons were selected from Balsamiq's built-in library.
5. All wireframes were designed to be simple, clean, and focused on user interaction and flow.

USER FLOW:

1. **Homepage:** Users can browse featured and currently showing movies, search for titles, and navigate to different genre categories.
2. **Now Showing Screen:** Displays currently showing and upcoming movies with genre filter tabs, ratings, and a Book Now button for each movie.
3. **Movie Details Screen:** Displays detailed information about a selected movie including synopsis, cast, available formats (2D/3D/IMAX), showtimes, and ratings.
4. **Seat Selection Screen:** Interactive seat map showing available, booked, and selected seats with category-wise pricing and a seat summary.
5. **Checkout Screen:** Shows booking summary with movie, theatre, showtime, seat details, promo code input, price breakdown, and payment options.
6. **Payment Confirmation Screen:** Displays payment success, booking ID, order summary, downloadable QR e-ticket, and options to download or continue browsing.

HOMEPAGE

Components: Search bar, banner/carousel for featured movies, genre filter strip, now showing thumbnails with title and ratings, featured movies section.

Purpose: Acts as the starting point for exploring currently showing and upcoming movies in the app.

NOW SHOWING SCREEN

Components: Genre filter tabs (All, Action, Drama, Comedy, Sci-Fi), scrollable movie list with poster thumbnail, title, meta info, ratings, and Book Now button.

Purpose: Helps users browse and filter movies by genre and quickly book their preferred show

MOVIE DETAILS SCREEN

Components: Movie poster/trailer area, title, genre, duration, rating, format selector (2D/3D/IMAX), synopsis, cast thumbnails, showtime slots, and Book Tickets button.

Purpose: Provides complete movie information to support the user's booking decision.

SEAT SELECTION SCREEN

Components: Movie and showtime chip, screen indicator, interactive seat map grid with colour-coded seat states (Available, Booked, Selected), seat category pricing legend, seat summary bar, and Confirm Seats button.

Purpose: Allows users to interactively choose their preferred seats before proceeding to checkout.

CHECKOUT SCREEN

Components: Booking summary card (movie, theatre, date, seats), promo code input with Apply button, itemised price breakdown (seats, convenience fee, GST), total amount, payment options (UPI, Credit Card, Cash on Delivery), and Pay Now button.

Purpose: Displays the complete booking details and collects payment to finalise the ticket purchase.

PAYMENT CONFIRMATION SCREEN

Components: Success checkmark, confirmation message, booking ID, order summary (movie, theatre, date, seats, amount paid), QR e-ticket placeholder, Download E-Ticket button, and Continue Browsing button.

Purpose: Final step confirming successful payment and providing the user with their e-ticket. Payment Successful! Your e-ticket will be delivered within 3–5 minutes.
