

EXPERIMENT 9

ROLL NO: 240701442

NAME: ROSHINI S

Design input forms that validate data (e.g., email, phone number) and display error messages using HTML/CSS, JavaScript (with Validator.js)

AIM: The aim is to design input forms that validate data such as email and phone number, and display error messages using HTML, CSS, and JavaScript with Validator.js.

PROCEDURE

Step 1: Setting Up the HTML Form

Create an HTML form with input fields for email and phone number.

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <title>Form Validation</title>

  <link rel="stylesheet" href="style.css">

</head>

<body>

<div class="container">

  <form id="myForm">

    <label>Email:</label>

    <input type="text" id="email">

    <span id="emailError" class="error"></span>

    <label>Phone Number:</label>

    <input type="text" id="phone">

    <span id="phoneError" class="error"></span>

    <button type="submit">Submit</button>

  </form>
```

```
</div>
```

```
<script  
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.9.0/validator.min.js"></script>
```

```
<script src="script.js"></script>
```

```
</body>
```

```
</html>
```

Step 2: Styling the Form with CSS

```
body {  
  font-family: Arial, sans-serif;  
  background-color: #f4f4f4;  
  display: flex;  
  justify-content: center;  
  align-items: center;  
  height: 100vh;  
  margin: 0;  
}  
  
.container {  
  background-color: white;  
  padding: 20px;  
  border-radius: 5px;  
  box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);  
}  
  
form {  
  display: flex;  
  flex-direction: column;  
}  
  
label {  
  margin-bottom: 5px;
```

```
}  
  
input {  
    margin-bottom: 10px;  
    padding: 10px;  
    border: 1px solid #ccc;  
    border-radius: 3px;  
}  
  
button {  
    padding: 10px;  
    background-color: #28a745;  
    color: white;  
    border: none;  
    border-radius: 3px;  
    cursor: pointer;  
}  
  
button:hover {  
    background-color: #218838;  
}  
  
.error {  
    color: red;  
    font-size: 0.875em;  
}
```

Step 3: Adding JavaScript for Validation

```
document.getElementById('myForm').addEventListener('submit', function (e) {  
    e.preventDefault();  
  
    let email = document.getElementById('email').value;  
    let phone = document.getElementById('phone').value;
```

```
let emailError = document.getElementById('emailError');
let phoneError = document.getElementById('phoneError');

// Clear previous errors
emailError.textContent = '';
phoneError.textContent = '';

// Validate email
if (!validator.isEmail(email)) {
    emailError.textContent = 'Please enter a valid email address.';
}

// Validate phone number
if (!validator.isMobilePhone(phone, 'any')) {
    phoneError.textContent = 'Please enter a valid phone number.';
}

// If valid
if (validator.isEmail(email) && validator.isMobilePhone(phone, 'any')) {
    console.log('Email:', email);
    console.log('Phone:', phone);
}
});
```

Form Validation

Email:

Phone Number:

(Valid Input – No Error Messages)

Form Validation

Email:

Please enter a valid email address.

Phone Number:

Please enter a valid phone number.
